

Live PDF markups and updates from the whole team, wherever you are. Made for detailed drawing review.

Bullclip is a collaborative drawing markup platform built for design and construction, and is the most easy-to-use and precise digital markup platform available today. It's now easy to completely eliminate printing from your project.

Built on intuitive design, a focus on precision markup and made for the cloud, Bullclip allows anyone to quickly find, review and collaborate on their construction markups on site or in the office.

SMART RENDERING

MARKUPS

Top Features

- Best-in-class **smart rendering** technology loads complex and detailed plans in seconds.
- **See markups sync immediately** - live markup and individual **layers** keep your team on the same page.
- **Version control** and **markup audit trails** on drawings eliminate confusion across revisions.
- **Document tagging**, an open API and Optical Character Recognition (**OCR**) help contributors get the job done faster.
- Mark up on your Windows 10 device (including Surface Hub), iPad, iPhone or in any modern web browser.

Bullclip on Surface

Whether you are on the road, in the office or on site, Bullclip is wherever you are with Surface. Bring lifelike precision to your markups, access powerful processing power and protect your projects with Windows 10 security.
